SUMMARY

Backend/System Engineer focused on manufacturing and warehouse digitalization, experienced in building operational systems on top of legacy ERP environments (Infor/Baan). Skilled in inventory traceability, FIFO validation, warehouse visualization, transactional systems, maintenance monitoring, and accounting workflows.

EDUCATION

Politeknik STMI Jakarta, Ministry of Industry

Applied Bachelor in Computer Science - Industrial Information Systems; GPA: 3.77/4.00

Jakarta, Indonesia

Sep. 2022 – Expected Aug. 2026

EXPERIENCE

Full Stack Developer / System Engineer Intern

PT Gemala Kempa Daya, Astra Otoparts Group

Feb. 2025 – Present

Jakarta, Indonesia

- Developed a FIFO-based floor-storage warehouse monitoring system supporting 48 material blocks and 400+ weekly transactions with QR gate in/out, digital block visualization, and supply scheduling, reducing material search cycle time by 76.30% from 103.00 to 24.42 minutes.
- Built a finished goods warehouse visualization system for Giant Rack Plant 3, mapping 80+ rack columns across multi-layer, top, and side U-shape storage layouts with customer filtering, barcode scanning, shipment status tracking, and operator guidance.
- Built inventory aging and LMB reporting modules for accounting reconciliation, supporting 30K+ row multi-sheet Excel exports in around 9 seconds with drill-down tracing from warehouse summary to transaction details.
- Designed Smart Andon maintenance monitoring with QR validation, lifecycle tracking, technician activity monitoring, and MTTR visibility for production issue handling workflows.
- Developed maintenance cost approval workflows integrating sparepart usage, COA classification, asset submission, and multi-level approval tracking between Maintenance and Accounting.
- Executed phased Oracle-to-PostgreSQL migration for Trucking Control System using an application-level dual-write strategy to maintain zero downtime during live production operations.

Web Developer

Nirmala Technology

Aug. 2024 – Jan. 2025

Jakarta, Indonesia

- Developed client web applications including a QR-based restaurant ordering system with cart, checkout, order tracking, Midtrans payment webhook, and admin dashboard modules.
- Built coliving and cafe event booking modules with room/event availability, deposit payment via Midtrans, payment status polling, webhook handling, email notification, and role-based admin CMS.
- Developed a bilingual corporate profile platform using Laravel 11 and Tailwind CSS, and built responsive UI components for Q-Tin Dashboard using DaisyUI and Flowbite.

PROJECTS & ACHIEVEMENTS

SME Digital Platform, Hackathon 2nd Place | *Laravel, Tailwind CSS, WhatsApp API*

Jun. 2025

- Awarded 2nd place nationally for developing an MSME digital platform with WhatsApp chatbot integration to support user engagement and digital marketing workflows.

AI Defect Detection System | *YOLOv8, Roboflow, Streamlit, WebRTC*

Dec. 2024

- Built an end-to-end visual inspection pipeline for automotive parts including dataset annotation, model training, and real-time inference deployment.

SIPS Android Archiving System | *Kotlin, Laravel 10, REST API*

Sep. 2024 – Dec. 2024

- Designed and developed an Android archiving system with Laravel REST API after workflow benchmarking at BBSPJIKFK, Ministry of Industry.

TECHNICAL SKILLS

Core: Manufacturing Systems, Warehouse Management, Inventory Traceability, ERP Integration, Business Process Automation

Backend & Database: Laravel, PHP, PostgreSQL, Oracle PL/SQL, REST APIs, SQL Optimization, Database Migration

Frontend & Reporting: JavaScript, jQuery, DataTables, SheetJS, Tailwind CSS, DaisyUI, Flowbite, JasperReports

Tools & AI/ML: Git, Figma, Roboflow, YOLOv8, Streamlit, WebRTC, Midtrans
