Summary

Full Stack Developer experienced in building enterprise CRM and operational systems with Laravel and React, with a background in manufacturing and warehouse digitalization on top of legacy ERP environments (Infor/Baan). Skilled in REST API design, role-based access systems, AI feature integration, inventory traceability, and modern component-based frontend architectures.

Education

Politeknik STMI Jakarta, Ministry of Industry

Jakarta, Indonesia

Applied Bachelor of Computer Science - Industrial Automotive Information Systems; GPA: 3.77/4.00

Sep. 2022 – Jul. 2026

- Thesis: Implementation of a Steel Sheet Monitoring Information System to Improve Material Search Efficiency at PT Gemala Kempa Daya — reduced warehouse material search and information retrieval time by 76.10% (103.00 to 24.62 minutes), validated via time study over 30 measurement cycles.

Experience

Full Stack Developer

Jun. 2026 – Present

PT Data Teknologi Terintegrasi

Jakarta, Indonesia

- Developing VALAK CRM, an actuarial consulting CRM platform, using Laravel 12 and React 19 across authentication, master data, calculation, and reporting modules.
- Built role-based dashboards and task/todo management views for admin, sales (AM), marketing, data, actuary, and finance roles, including an internal dashboard for the actuarial team.
- Developed calculation submission and progress-tracking features, integrating calculation APIs and per-PIC company dropdown endpoints into the frontend workflow.
- Integrated AI-powered summary insights (Kimi AI for NirmaAI) and a data-labeling API for role-based document management.
- Implemented core platform modules including login, PIC management, group management CRUD, client-group linking, revision-note chatroom for report review, and project ID/number administration APIs.

Full Stack Developer / System Engineer Intern

Feb. 2025 – Jun. 2026

PT Gemala Kempa Daya, Astra Otoparts Group

Jakarta, Indonesia

- Developed a FIFO-based floor-storage warehouse monitoring system supporting 48 material blocks and 400+ weekly transactions with QR gate in/out, digital block visualization, and supply scheduling, reducing material search cycle time by 76.10% from 103.00 to 24.62 minutes (validated via work measurement / time study).
- Built a finished goods warehouse visualization system for Giant Rack Plant 3, mapping 80+ rack columns across multi-layer, top, and side U-shape storage layouts with customer filtering, barcode scanning, shipment status tracking, and operator guidance.
- Built inventory aging and LMB reporting modules for accounting reconciliation, supporting 30K+ row multi-sheet Excel exports in around 9 seconds with drill-down tracing from warehouse summary to transaction details.
- Designed Smart Andon maintenance monitoring with QR validation, lifecycle tracking, technician activity monitoring, and MTTR visibility for production issue handling workflows.
- Developed maintenance cost approval workflows integrating sparepart usage, COA classification, asset submission, and multi-level approval tracking between Maintenance and Accounting.
- Executed phased Oracle-to-PostgreSQL migration for Trucking Control System using an application-level dual-write strategy to maintain zero downtime during live production operations.

Web Developer

Aug. 2024 – Jan. 2025

Nirmala Technology

Jakarta, Indonesia

- Developed client web applications including a QR-based restaurant ordering system with cart, checkout, order tracking, Midtrans payment webhook, and admin dashboard modules.
- Built coliving and cafe event booking modules with room/event availability, deposit payment via Midtrans, payment status polling, webhook handling, email notification, and role-based admin CMS.
- Developed a bilingual corporate profile platform using Laravel 11 and engineered responsive, component-based UI architectures for Q-Tin Dashboard using DaisyUI and Flowbite.

Projects & Achievements

E-Brochure Digital Catalog — Indomobil | Next.js, TypeScript, Tailwind CSS

- Engineered an interactive digital automotive catalog featuring dynamic vehicle showcases, customizable color selections, and direct WhatsApp integrations for seamless sales lead generation.

SME Digital Platform, Hackathon 2nd Place | Laravel, Tailwind CSS, WhatsApp API

Jun. 2025

- Awarded 2nd place nationally for developing an MSME digital platform with WhatsApp chatbot integration to support user engagement and digital marketing workflows.

AI Defect Detection System | YOLOv8, Roboflow, Streamlit, WebRTC

Dec. 2024

- Built an end-to-end visual inspection pipeline for automotive parts including dataset annotation, model training, and real-time inference deployment.

Technical Skills

Core: Full Stack Development, CRM Systems, Manufacturing & Warehouse Systems, ERP Integration, Process Automation

Backend & Database: Laravel 12, PHP, PostgreSQL, Oracle PL/SQL, REST APIs, SQL Optimization, Database Migration

Frontend & UI: React 19, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, DaisyUI, Flowbite, Framer Motion

Tools & AI/ML: Git, Figma, Roboflow, YOLOv8, Streamlit, WebRTC, Midtrans, AI API Integration

Certification: Database Administrator — BNSP National Professional Certification
